Purpose of Document

1. Purpose of Document

The purpose of this document is to provide a summary of the User Acceptance Testing (UAT) conducted for the project "Explore with AI: Custom Itineraries for Your Next Journey.".

This document outlines the overall test coverage, functionality validation, performance verification, and defect status at the time of release. It ensure that the AI-based travel itinerary generation system meets the defined functional and non-functional requirements.

The report confirms that:

- User inputs (destination, days, nights) are validated correctly
- AI-generated itineraries are accurate and structured properly
- PDF download functionality works as expected
- API integrations (Gemini API, image API) function succesfully
- The system performs efficiently under normal usage conditions

This document serves as formal confirmation that the system is ready for deployment and end-user usage.

2. Defect Analysis

This section summarizes the defects identified during development and testing of the AI Travel Itinerary Generator, categorized by severity levels.

Severity Levels:

- **Severity 1 (Critical):** Application crash, API failure, system not usable
- **Severity 2 (Major):** Incorrect itinerary generation, PDF errors
- **Severity 3 (Medium):** Input validation errors, formatting issues
- **Severity 4 (Low):** UI alignment, minor text inconsistencies

Defect Summary Table

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
